EU DEMOCRACY

Projects

Digital Democracy

You Vote EU: The aim of the project is to stimulate the participation of EU citizens in the 2019 European Parliament elections and increase the understanding of current and future EU policies. The project successfully created an innovative web platform that will inform voters on EU policies and connect voters with their current representatives, new candidates or other voters.

We are Europe – Empowering European Civil Society (WAE): The aim of the project is to allow civil society organisations (CSOs) to become actors in the “Future of Europe debate” in the 2018-2019 period. The project will equip CSOs with the necessary tools to participate in bottom-up initiatives regarding the debate on the future of Europe at all levels.

Road to European Parliament 2019 – Empowering a new generation of EU citizens (REP 2019): The aim of the project is to increase the participation of young people (aged 18-19) to the 2019 European Parliament elections. This ambitious goal will be achieved by designing and delivering a training programme directed towards students attending their last year of school and aimed to increase the understanding and participation of young people to the European Union political and decisional process (understanding of EU institutions, the process of lobbying, implementing EU projects, etc.).

Understanding Populism

Democratic Efficacy and the Varieties of Populism in Europe (DEMOS): The project is built on the assumption that populism is symptomatic of disconnect between how democratic polities operate and how citizens perceive their own aspirations, needs and identities within the political system. As such, DEMOS explores the practical value of 'democratic efficacy' as the condition of political engagement needed to address the challenge of populism.

Peel back the layers on populism with this study on "**Societies outside Metropolises: the role of civil society organisations in facing populism**", carried out by ECAS on behalf of the European Economic and Social Committee.

Online Disinformation

Smart eDemocracy Against Fake News (SMART eD): The project aims to foster European citizenship and improve conditions for civic and democratic participation at EU level by raising citizens' awareness of national and EU level initiatives to counter fake news and online disinformation.

Services to citizens

European Citizens' Initiative Forum: in the second year of the pilot-project, ECAS will continue its work in supporting Secretariat-General of the European Commission in the development and the implementation of online the collaborative platform that offers support to citizens when organising a European citizens' initiative.

European Citizens' Initiative Forum SEEK Advice: ECAS is responsible for handling the enquiries of (potential) ECI organisers received through the SEEK Advice function of the ECI Forum. The responses to the enquiries are provided in any of the official EU languages within maximum 8 working days. The advice provided includes, legal aspects, campaigning and fundraising advice, and any other relevant topics.
